921 U2620 HW11

TOTAL POINTS

4/4

QUESTION 1

Visualize and analyze distribution of extracted features across different classes. 2 pts

- 1.1 Make t-SNE plots of the distribution of extracted features of 3 stages across different classes. 1 / 1
 - √ 0 pts Correct
 - **0.5 pts** Dots in the same group should have similar color.
 - 0.5 pts Should be 3 plots
 - 1 pts Incorrect
 - **0.5 pts** The dots should be more separated into groups in final stage
 - 0 pts Click here to replace this description.
 - 1 pts You should not use the sample plot from slide
- 1.2 Explain and compare the distribution of features on different stages. (Hint: Is is a good feature extractor for classification? Why or why not?) 1 / 1
 - √ 0 pts Correct
 - 1 pts No analysis provided
 - 0.5 pts Only 1 plot is provided

QUESTION 2

Visualize and analyze distribution of extracted features across different domains. 2 pts

- 2.1 Make t-SNE plots of the distribution of extracted features of 3 stages across different classes. 1/1
 - √ 0 pts Correct
 - 1 pts You should not submit the sample plot from slide
 - 0.5 pts There should be 3 plots
 - 1 pts No plot is provided
- 2.2 Explain and compare the distribution of features on different stages. (Hint: Is it a good feature extractor for DA? Why or why not?) 1 / 1
 - ✓ 0 pts Correct
 - 1 pts You should not use the example plot from slide
 - 1 pts No analysis is provided
 - 1 pts No plot is provided

1. 以下依序為 early, middle, final stage 的 t-SNE(epoch 分別為 1, 1500, 3000)

2. 可以看到 early stage 中不同 class 在的點幾乎都疊在一起,所以可能對於 classifier 是比較不好辨別的,而呼應一開始的 acc 很低; middle 和 final 其實把不同類別都分的蠻開的,有分成一群一群的,而其實這 2 個 stage 的 acc 其實都有到 0.98 – 0.99,代表在 training dataset 上面這 2 個 stage 的 features 都有很好的分開來。

2.

1. 以下依序為 early, middle, final stage 的 t-SNE(epoch 分別為 1, 1500, 3000), 藍色為 source、紅色為 target

1.1 Make t-SNE plots of the distribution of extracted features of 3 stages across different classes. 1 / 1

- ✓ 0 pts Correct
 - **0.5 pts** Dots in the same group should have similar color.
 - 0.5 pts Should be 3 plots
 - 1 pts Incorrect
 - 0.5 pts The dots should be more separated into groups in final stage
 - **0 pts** Click here to replace this description.
 - 1 pts You should not use the sample plot from slide

2. 可以看到 early stage 中不同 class 在的點幾乎都疊在一起,所以可能對於 classifier 是比較不好辨別的,而呼應一開始的 acc 很低; middle 和 final 其實把不同類別都分的蠻開的,有分成一群一群的,而其實這 2 個 stage 的 acc 其實都有到 0.98 – 0.99,代表在 training dataset 上面這 2 個 stage 的 features 都有很好的分開來。

2.

1. 以下依序為 early, middle, final stage 的 t-SNE(epoch 分別為 1, 1500, 3000), 藍色為 source、紅色為 target

- 1.2 Explain and compare the distribution of features on different stages. (Hint: Is is a good feature extractor for classification? Why or why not?) 1/1
 - ✓ 0 pts Correct
 - 1 pts No analysis provided
 - **0.5 pts** Only 1 plot is provided

2. 可以看到 early stage 中不同 class 在的點幾乎都疊在一起,所以可能對於 classifier 是比較不好辨別的,而呼應一開始的 acc 很低; middle 和 final 其實把不同類別都分的蠻開的,有分成一群一群的,而其實這 2 個 stage 的 acc 其實都有到 0.98 – 0.99,代表在 training dataset 上面這 2 個 stage 的 features 都有很好的分開來。

2.

1. 以下依序為 early, middle, final stage 的 t-SNE(epoch 分別為 1, 1500, 3000), 藍色為 source、紅色為 target

2. 可以看到 early stage 中 target、source 的分佈長的完全不一樣,代表 target 和 source 取出來的 feature 特徵不一樣導致的,所以可能對於 domain discriminator 是比較好辨別的,而呼應一開始的 discriminator acc 很高; middle 和 final 其實 2 者分佈模式蠻像的,雖然沒有像作業介紹的 PDF 幾乎疊在一起,但圖形大致上相符,把其中一個做旋轉後就可以大致上疊在一起了,這也反映出 discriminator 在這 2 個 stage 的 acc 都大約在 0.5 而已,代表discriminator 分佈出來 source / target 的差別,2 者取出來的 feature 長得差不多。

- 2.1 Make t-SNE plots of the distribution of extracted features of 3 stages across different classes. 1 / 1
 - ✓ 0 pts Correct
 - 1 pts You should not submit the sample plot from slide
 - **0.5 pts** There should be 3 plots
 - 1 pts No plot is provided

2. 可以看到 early stage 中 target、source 的分佈長的完全不一樣,代表 target 和 source 取出來的 feature 特徵不一樣導致的,所以可能對於 domain discriminator 是比較好辨別的,而呼應一開始的 discriminator acc 很高; middle 和 final 其實 2 者分佈模式蠻像的,雖然沒有像作業介紹的 PDF 幾乎疊在一起,但圖形大致上相符,把其中一個做旋轉後就可以大致上疊在一起了,這也反映出 discriminator 在這 2 個 stage 的 acc 都大約在 0.5 而已,代表discriminator 分佈出來 source / target 的差別,2 者取出來的 feature 長得差不多。

- 2.2 Explain and compare the distribution of features on different stages. (Hint: Is it a good feature extractor for DA? Why or why not?) 1/1
 - ✓ 0 pts Correct
 - 1 pts You should not use the example plot from slide
 - 1 pts No analysis is provided
 - 1 pts No plot is provided
